PROFILE

Software Engineering student with hands-on experience building full-stack, AI-assisted products across healthcare, fintech, and governance technology. Comfortable owning a project end-to-end — from architecture through implementation — and turning open-ended problem statements into working prototypes under competitive deadlines. Seeking a software engineering internship at a product-driven company.

PROJECTS

Seraphyne AI *AI-Powered Clinical Decision Intelligence Platform*

- Designed and prototyped an **AI-driven clinical simulation platform** enabling medical students to practice diagnostic decision-making through realistic AI patient interactions.
- Built a decision engine with **counterfactual analysis** and disease-progression simulation, giving learners structured feedback against alternative treatment paths.

Tech: React, FastAPI, OpenAI API, PostgreSQL

PRISM *Personal Risk & Insight Simulation Model*

- Built a rule-based, **multi-pathway simulation engine** that forecasts personalized health trajectories from sparse lifestyle data (sleep, nutrition, stress, activity).
- Prioritized **transparent, auditable logic** over black-box ML to keep health recommendations explainable to end users.

Tech: Python, FastAPI, React, PostgreSQL

VEOS *Village Entitlement & Opportunity System*

- Architected a **governance-technology platform** connecting eligible rural households to welfare schemes and local employment via a version-controlled eligibility roster.
- Designed for **2G connectivity and low digital literacy**, with offline SQLite caching and SHA-256-hashed identity data.

Tech: Android, SQLite, Node.js

MoneyGo *Gamified Financial Literacy Platform*

- Developed a **consequence-based financial-decision simulator** that models long-term outcomes of user choices to build practical money-management skills.
- Designed an **offline-first mobile architecture** for low-connectivity users.

Tech: Flutter, Node.js, Firebase, PostgreSQL

EDUCATION

Bachelor of Technology — Computer Science and Business Systems

Sri Sai Ram Engineering College, Chennai.

2024 – Present (Expected 2028)

TECHNICAL SKILLS

Languages

C, Java, JavaScript, Python

Frontend

HTML, CSS, JavaScript, React

Backend

Node.js, Express.js, FastAPI

SOFT SKILLS

- Problem-solving & analytical thinking
- Team leadership
- Cross-functional collaboration
- Clear technical communication
- Adaptability under ambiguity
- Self-directed learning

ACHIEVEMENTS

Ideathon 5.0 — Overall Winning Team

Team Lead — Software Development & Product Design
